

ExtreMexico QCD (XQCD11)

Extreme QCD is a series of international workshops covering recent advances in the theory and phenomenology of Quantum Chromodynamics (QCD) under extreme conditions of temperature and/or baryon density, and related topics. The meeting is held annually, usually scheduled in an adjacent week, and located in close geographical proximity, to the annual Lattice Symposium. This is the first Latin American edition of this event, based on a Brazilian-Mexican initiative.

Local Organizing Committee

- [Alejandro Ayala \(ICN/UNAM, Mexico City\)](#)

- [Wolfgang Bietenholz \(ICN/UNAM, Mexico City\) \(chair\)](#)
- Takeshi Kodama (UFRJ, Rio de Janeiro)
- [Tereza Mendes \(Univesidade de São Paulo\) \(chair\)](#)
- Maria Elena Tejeda-Yeomans (Universidad de Sonora)

International Advisory Committee

- Carleton DeTar (University of Utah)
- Domenec Espriu (Universitat de Barcelona)
- Philippe de Forcrand (ETH Zürich and CERN)
- Simon Hands (Swansea University)
- Frithjof Karsch (Bielefeld University and BNL)
- [Maria Paola Lombardo \(INFN, Frascati\)](#)
- Atsushi Nakamura (University of Hiroshima)
- Andreas Schäfer (Universität Regensburg)
- Thomas Schäfer (North Carolina State University)
- Horst Stöcker (GSI Darmstadt)
